DETAILED ACTION

Response to Amendment

The Amendment, filed on August 1, 2006 has been entered and acknowledged by the Examiner.

The drawing of Fig. 1 has been entered and approved by the Examiner.

Allowable Subject Matter

Claims 1 and 3-23 are allowed over the prior art of record.

Regarding claim 1, the prior art of record neither teaches nor suggests an arc lamp having all the limitations as claimed and particularly a filter mounted within the cavity containing the anode and the cathode.

Regarding claim 3 the prior art of record neither teaches nor suggests an arc lamp having a filter mounted within the cavity including an aperture through which the cathode goes.

Claim 4 is allowed because of its dependency status from claim 3.

Regarding claim 5 the prior art of record neither teaches nor suggests an arc lamp having a filter mounted within the cavity made of narrow band-pass glass.

Claims 6-8 are allowed for the same reason stated for claim 5 because of their dependency status from claim 5.

Regarding claim 9 the prior art of record neither teaches nor suggests an arc lamp with all the limitations as claimed and particularly comprising a filter mounted within the cavity between the strut holding the cathode and the arc gap.

Claims 10-15 are allowed because of their dependency status from claim 9.

Regarding claim 16 the prior art of record neither teaches nor suggests the method of making an arc lamp with all the limitations as claimed and particularly mounting a filter within the cavity defined by the body of the lamp and coupling a washer to the filter to hold the filter in place.

Regarding claim 17 the prior art of record neither teaches nor suggests the method of making an arc lamp with all the limitations as claimed and particularly coupling a washer to a filter mounted within the cavity, the filter defining an aperture substantially centered on the filter.

Claims 18-23 are allowed for the same reason stated for claim 17 because of their dependency status from claim 17.
